Assignment - 1

Theory:
Website usability analysis is the process of evaluating websites based on user experience parameters such as learnibility, usability, consistency, navigation, visual ~~teeeee~~ hierarchy, accessibility, responsiveness and trust. In this assignment, MakeMyTrip, Cleartrip, Skyscanner and IRCTC were compared based on their tourism and flight-booking features.
Each website was evaluated on its ease of use, flight search functionality, information presentation, booking process and overall user experience. The comparison helps identify the strengths and weaknesses of each website and areas where improvements can be made.

Conclusion:
The analysis helps compare the usibility of different tourism and flight-booking websites. A user-friendly interface, simple navigation, clear flight details, transparent pricing and an easy booking process are essential for improving user satisfaction and making travel ~~plans~~ planning more convinient.
