Assignment - 2

Theory:

The design is based on understanding user needs and improving the travel-booking experience. User personas help identify different types of travellers, their goals, preferences and difficulties while searching for destinations and booking flights.

The design focuses on simplifying flight search, comparing ticket prices, displaying clear travel information, improving navigation, providing destination recommendations and makings the booking process convinient. It aims to help users plan trips and book flights efficiently.

Conclusion:

The analysis helps identify travellers' needs and challenges when planning trips and booking flights. Simple navigation, ~~transparent~~ transparent pricing, clear flight details and an easy booking process can improve user satisfaction and make travel planning more convenient.
