Assignment -3

Aim:
To design a user-friendly mobile application interface that allows users to run and explore tourist destinations, flights, book tickets and plan their trips convinientily.

Theory:
The tourism and flight booking application helps users run and plan their trips officiently. It includes features such as destination search, flight booking, hotel reservations, travel recommendations and user profile management. Users can explore popular places select travel dates, compare flight options and manage their bookings through simple navigation and interactive features.

Conclusion:
The interface makes travel planning easier by combining destination exploration, flight booking and travel services in one place. Its simple layout and easy navigation help users plan trips and manage bookings conviniently.
